# Features

Our juicers are totally automatic:

There is no need to cut the oranges in half. Just place the oranges in the feeder basket and the machine will do everything for you at a high speed.

Our exclusive and unique rotating system is very attractive and visible, which attracts the attention of consumers, hence increases juice demand.

While squeezing, the juice is not in contact with the peel, avoiding the contact of the bitter taste with the juice.

Equipped with a 0.75 Hp motor and gears of steel, the Minimax model is certainly within the range of small equipment, the strongest and most robust machine on the market.

The machine is totally maintenance free.

Easy to dismantle, which takes only one minute, cleaning is really easy and will take less than 3 minutes.
