Fast with
automatic
feeder

zumoval

Features

Our juicers are totally automatic:
There is no need to cut the oranges
in half. Just place the oranges in the
feeder basket and the machine will do
everything for you at a high speed.

Our exclusive and unique rotating
system is very attractive and visible,
which attracts the attention of
consumers, hence increases juice
demand.

While squeezing, the juice is not in
contact with the peel, avoiding the
contact of the bitter taste with the
juice.

Equipped with 0.75 Hp motor and gears of steel, the Top model is certainly within the range of small equipment, the strongest and most robust machine on the market.

The machine is totally maintenance free.

Easy to dismantle, which takes only one minute, cleaning is really easy and will take less than 3 minutes.

Fruits per minute

120

Litres per hour

Places with medium to high consumption:
Hotels, restaurants, coffee shops, juice bars, events...

Machine options

ORANGE COUNTER

Counts the amount of oranges that have been juiced by the machine, allowing the customer to monitor consumption.

00525

AUTOMATIC SHOWER

This option provides a flushing system that cleans quickly the juicing area, saving time and labour cost and keeping the juicer clean and hygienic at all times.

SELF SERVICE TAP

The easy-to-use automatic tap is connected directly to the motor of the machine. Open the tap and the machine starts running. Close the tap and the machine stops. Perfect solution for buffet services. Anti-dripping system.

Stand options

Self service stand

Cooled dispenser stand

Dispenser stand

STANDS

The Top model allows the possibility to incorporate the Dispenser stand, Self service stand and Cooled dispenser stand.

JUICE LEVEL DETECTOR

Thanks to this system you can always count on 5 litres of fresh orange juice, automatically and constantly juiced, ready to serve. This system is ideal for self-service and big volume sites.

BIG CAPACITY JUICE FILTER

Stainless steel Juice Tray and filter, specially designed for buffet service and supermarkets with high consumption. The juice tray has a big Filter with high capacity, double-curved design and a pulp moving stick (Pulp-away system). This option allows squeezing more than 20 liters of juice without cleaning the filter.
